

# NU-CRYL AG Extra

## Anti Graffiti for Heavy Wear Surfaces

**Invisible protection in one application**

### USES

Nu-Cryl AG Extra is a unique, clear, hydrophobic acrylic coating that will protect against dirt, pollution and graffiti. It is used on vertical and horizontal, dense, low porosity substrates such as marble, granite, terrazzo, polished concrete and engineering brick. It is an effective chewing gum repellent.

Nu-Cryl AG Extra has excellent stain resistant and water repellent qualities and gives long life graffiti and environmental protection. It has outstanding resistance to weathering and ultra-violet degradation, and no reapplication is required after graffiti removal.

This product satisfies Class '0' requirements of current Building Regulation.

COVERAGE	8-15m <sup>2</sup> /L depending on substrate type.
CURING TIME	Touch dry 2-3 hours Waterproof 24 hours Full cure 5 days Allow 72 hours before treating with Silane.
APPLICATION TEMP.	>5°C
APPLICATION	Single
APPLICATION METHOD	Low pressure spray, brush or roller.
PACKAGE	5L/25L drums
SHELF LIFE	12 months in original sealed container.
STORAGE	Away from direct sunlight and sources of heat. Protect from frost.

### PRODUCT OVERVIEW

### BENEFITS

- **Excellent graffiti protection**
- **Effective gum repellent**
- **Invisible coating**
- **Meets Class 'O' requirements**
- **Protects for up to 15 years**
- **Solvent free**
- **Single application**
